WHO WE ARE

Amankit Pipes Manufacturing Pvt. Ltd. With brand name **GLYCO PIPES** is a trusted name in India's piping and water-management industry. Based in Kangoi Industrial Area, Mihijam, Jharkhand, we specialize in producing high-quality PVC Pipes, U-PVC Pipes, Garden Pipes, Plumbing Pipes, Casing Pipes and Pipe Fittings that are built to last.

With a strong commitment to innovation, durability, and customer satisfaction, we manufacture products that deliver reliable performance across domestic, agricultural, and industrial applications. Every pipe and fitting is crafted using advanced technology and strict quality controls to ensure long-lasting strength, leak-free performance, and true value for money.

Guided by our belief "हम चुकाते हैं एक-एक बून्द की कीमत" - We strive to conserve water, protect resources, and support India's growing infrastructure with dependable piping solutions.

OUR MISSION

Our mission is to provide world-class quality at competitive prices while building long-term trust with retailers, distributors, and customers across the country. At Amankit Pipes, quality is not just a standard - it is our identity.

MATERIAL CHARACTERISTICS

LIGHT WEIGHT

Light weight makes it easier and less costly to handle, transport and install. In fact, most PVC-U pipe and fitting sizes can be handled manually, reducing the need for expensive installation equipment.

HIGHER FLOW RATE

PVC-U pipes provide smooth wall surface to give high flow rate and reduce the possibility of build up inside the system which will lead to blockages.

CORROSION RESISTANCE

PVC-U pipes and fittings are non-conductors of electricity and immune to electrochemical reactions.

IMPACT STRENGTH

Under normal conditions, PVC-U pipes possess relatively high resistance to impact damage when compared to pipes made from clay, concrete and most other conventional materials.
